💼 Work Experience

Event Logistics Intern

Universitas Kristen Satya Wacana · January 2019 - April 2019

- Assisted in planning and organizing logistical aspects for events, including accommodation, transportation, and equipment.
- Supported collaboration with departments and vendors to ensure smooth execution.
- Helped manage budgets and ensured expenses stayed within plan.
- Coordinated volunteer teams and ensured tasks were completed efficiently.
- Contributed to post-event evaluation reports to improve future events.

Business Plan Intern

Universitas Kristen Satya Wacana · January 2019 - April 2019

- Conducted market research to identify potential business opportunities and target markets.
- Collaborated with team members to develop comprehensive business plans with projections and go-to-market strategies.
- Analyzed data to support business decisions and provide insights.
- Prepared presentations and reports for stakeholders.
- Assisted in implementation and monitoring of business plans for successful execution.

E-Business Intern

Universitas Kristen Satya Wacana · August 2019 - December 2019

- Conducted market research to identify potential business opportunities and target markets.
- Collaborated with team members to develop business plans with financial projections and marketing strategies.
- Analyzed data to support business decisions and provide actionable insights.
- Prepared presentations and reports to communicate business plans to stakeholders.
- Assisted in implementation and monitoring to ensure successful execution.

💼 Employment History

Freelance Software Developer & Data Analyst

Upwork · August 2025 - Present

- Designed and delivered a full-stack restaurant e-commerce platform with secure checkout, multi-gateway payments, automated tax, live chat, dashboards for orders/payments/refunds, detailed reporting, and bilingual UX. Optimized backend workflows for tracking, delivery updates, and audit logs while providing analytics on sales trends and customer behavior.
- Key achievement: Launched a complex restaurant e-commerce system that boosted online sales, reduced workload, and improved customer satisfaction.

🎓 Education

Universitas Kristen Satya Wacana (UKSW)

- Bachelor's in Financial Management, 2021

PORTFOLIO PROJECTS

- **Salifort-Motors-project-lab**
  The models and the feature importances extracted from the models confirm that employees at the company are overworked.
  - Link: https://github.com/Pandu2021/Salifort-Motors-project-lab-
  - Description: A data analytics project focused on improving customer retention.
- **Portofolio Website**
  A personal portfolio site showcasing projects, certifications, and contact details with responsive design and dark mode.
