**Data & Analytics**: Python, Tableau, BigQuery, ETL, dashboards, regression, machine learning, statistics

**Business**: Financial management, budgeting, business planning, project management, B2B pricing, stakeholder communication

**Languages**: Bahasa Indonesia (Native); English (Basic Professional Working Proficiency)

## Professional Experience

**Freelance Full-Stack Developer (Independent)** 2025 – Present
*Confidential Client, Food & Beverage Industry* *Remote*

- Designed and built, as the sole developer, a production ordering and operations platform: customer storefront, B2B partner portal, admin console, and REST API (React, TypeScript, NestJS, Prisma, PostgreSQL).
- Integrated online payments through a third-party gateway with automated reconciliation, and built a configurable pricing engine for tax, fees, promotions, and delivery.
- Replaced manual B2B ordering with a role-based partner channel featuring separate retail and wholesale pricing.
- Delivered real-time order tracking, live chat, back-office automation, and automatic receipt printing through Android and Windows print agents.
- Applied secure development practices (authentication and authorization, input protection, automated security scanning) and shipped CI/CD with Docker, GitHub Actions, and automated tests.

## Education

**Bachelor of Economics (S.E.), Management – Financial Management** Sep 2015 – Apr 2021
*Universitas Kristen Satya Wacana, Faculty of Economics and Business* *Salatiga, Indonesia*

**Coursework:** Financial Management, Advanced Financial Management, Banking & Financial Institutions, Budgeting, Managerial Accounting, Risk Management, Business Statistics, E-Business, Business Plan, Project Management.
