Pandu Wicaksono

Full-Stack Developer | E-commerce & Business Systems

Indonesia

LinkedIn: linkedin.com/in/pandu-wicaksono-2b8430335 | **Portfolio Website:** pandu2021.github.io/Portofolio-website

Professional Profile

Full-stack developer with a Bachelor of Economics in Financial Management. Built, as the sole developer, a production ordering and operations platform for an international food and beverage client. Certified by Google, IBM, Microsoft, and Amazon in full-stack development and data analytics. Open to full-stack, front-end, and software engineering roles in e-commerce and business systems.

Core Competencies

Front-End: React, Next.js, Angular, Vue, TypeScript, JavaScript, Vite, HTML5, CSS3, Tailwind CSS, TanStack Query, Zustand, RxJS, i18n, Accessibility (WCAG)

Back-End: Node.js, NestJS, Express, Prisma, PostgreSQL, SQL, REST APIs, Server-Sent Events (SSE)

Security & Payments: Authentication and authorization, secure payment integration, secure coding practices, automated security scanning

DevOps & Quality: Docker, GitHub Actions, CI/CD, Vitest, Jest, TDD, Git

AI-Assisted Development: GitHub Copilot, Claude Code, ChatGPT, Google Gemini, Microsoft Copilot; every AI-assisted change is reviewed, tested, and security-scanned

Mobile: Kotlin (Android), Swift, SwiftUI, SwiftData, React Native, on-device AI (Apple Foundation Models)

Certified Coursework: Java, JUnit, OOP, data structures, C#, ASP.NET Core, Blazor, Entity Framework Core, Django, Kubernetes, microservices, Agile, SDLC, Linux, SIEM, network security, threat detection, Figma, user research, prototyping, digital marketing, Google Analytics

Data & Business: Python, Tableau, BigQuery, ETL, data modeling, BI dashboards, data visualization, regression, machine learning (decision trees, random forest, XGBoost), statistics, financial management, budgeting, business planning, market research, project management, stakeholder communication

Languages: Bahasa Indonesia (Native proficiency); English (Basic professional working proficiency)

Professional Experience

Freelance Full-Stack Developer (Independent) 2025 – Present

Confidential Client, Food & Beverage Industry *Remote*

- Designed and built, as the sole developer, a production ordering and operations platform: customer storefront, B2B partner portal, admin console, and REST API, spanning 45+ pages (React, TypeScript, NestJS, Prisma, PostgreSQL).
- Integrated online payments through a third-party gateway with automated reconciliation, and built a configurable pricing engine for tax, fees, promotions, and delivery.
- Launched a B2B ordering channel with role-based access and separate retail and wholesale pricing, replacing manual ordering.
- Delivered real-time order tracking, live chat, back-office automation, and automatic receipt printing through Android and Windows print agents.
- Applied secure development practices (authentication and authorization, input protection, automated security scanning) and shipped CI/CD with Docker, GitHub Actions, and about 95 automated test files.

Portfolio Projects

- **Portfolio Website** *(Next.js, React, TypeScript, i18n; live)*: Statically generated, bilingual, and accessible site with light and dark themes.
- **Storefront Demo** *(React, Vite, TypeScript, Vitest; live demo)*: Café menu with search, filters, a saved cart, promo codes, and an accessible demo checkout.
- **Admin Dashboard Demo** *(Angular, RxJS, TypeScript, Vitest; live demo)*: Order back office with mock sign-in, a live RxJS order feed, typed reactive forms, and accessible SVG charts.
- **Invoice & Pricing Tool** *(Vue, TypeScript, Vitest; live demo)*: Invoice editor with a tested pricing engine for line discounts, service fees, inclusive or exclusive tax, and rounding.

Certification Projects

- **Little Lemon (React Native App)** *(Meta React Native, in progress, 2026)*: Built a cross-platform mobile app with React Native and JavaScript (ES6+): Stack, Tab, and Drawer navigation, FlatList views, dynamic cart calculations, and Jest unit tests.
- **Data Analytics Case Study** *(Google Data Analytics Capstone, 2026)*: Analyzed a business scenario end to end (Ask, Prepare, Process, Analyze, Share, Act) and presented data-driven recommendations.
- **SmartTravelJournal (iOS App)** *(Developing iOS Apps with Swift, IBM & SkillUp, 2026)*: Built a journaling app with Swift 6, SwiftUI, MVVM, and SwiftData, featuring on-device AI summaries (Apple Foundation Models), MapKit, live weather data, and Swift Charts.
- **Full-Stack Developer Capstone** *(Microsoft Full-Stack Developer, 2026)*: Integrated a Blazor front end with an ASP.NET Core Web API, Entity Framework Core, and ASP.NET Identity in a full-stack .NET application, using Microsoft Copilot.
- **Salifort Motors Project Lab** *(Google Advanced Data Analytics Capstone, 2026)*: Analyzed employee data in Python (EDA, visualization, predictive modeling) to identify drivers of attrition, including overwork, and recommended retention actions.
- **Java Desktop Application** *(Amazon Junior Software Developer Capstone, 2025)*: Built a Java desktop application with integrated data handling and a graphical interface, applying object-oriented design and unit testing.
- **Full Stack Application** *(IBM Full Stack Software Developer Capstone, 2025)*: Combined React, Node.js, Express, and Django into a full-stack web application deployed to the cloud with containers and CI/CD.
- **Business Intelligence Dashboard** *(Google Business Intelligence, 2025)*: Planned a BI project, built a data pipeline, and designed an interactive Tableau dashboard with an executive summary.

Education

Bachelor of Economics (S.E.), Management – Financial Management Sep 2015 – Apr 2021
Universitas Kristen Satya Wacana, Faculty of Economics and Business *Salatiga, Indonesia*

Relevant Coursework: *Finance* – Financial Management, Advanced Financial Management, International Financial Management, Banking & Financial Institutions, Budgeting, Managerial Accounting, Risk Management. *Analytics* – Business Statistics, Decision-Making Analysis, Corporate Performance Analysis. *Business & Technology* – Information Technology Applications, Project Management, Strategic Management, Marketing Management.

Academic Experience

- **E-Business Internship** (Aug–Dec 2019): conducted market research on business opportunities, customer segments, and target markets; contributed to business plans with financial projections and marketing approaches.
- **Business Plan Project** (Jan–Apr 2019): market research, financial projections, and stakeholder presentations.
- **Event Organizing Committees** (2018–2019): handled logistics and vendor coordination, tracked expenses against the budget, and coordinated volunteers.

Certifications

- **Google Data Analytics**, Google (Nov 2026)
- **Developing iOS Apps with Swift**, IBM & SkillUp (Aug 2026)
- **Microsoft Full-Stack Developer**, Microsoft (Aug 2026)
- **Google Advanced Data Analytics**, Google (Jun 2026)
- **Amazon Junior Software Developer**, Amazon (Aug 2025)
- **IBM Full Stack Software Developer**, IBM (Jul 2025)
- **Google Business Intelligence**, Google (Jun 2025)
- **Google Cybersecurity**, Google (Jun 2025)
- **Google UX Design**, Google (Jun 2025)
- **Google Digital Marketing & E-commerce**, Google (Jun 2025)
- **Capital Market School 2020 (Participant; program with IDX, KSEI, and KPEI)**, Investor Club, UKSW (Jul 2020)
