Languages: Bahasa Indonesia (Native); English (Basic Professional Working Proficiency)

Professional Experience

Freelance Full-Stack Developer (Independent) 2025 – Present
Confidential Client, Food & Beverage Industry *Remote*

- Designed and built, as the sole developer, a production ordering and operations platform: customer storefront, B2B partner portal, admin console, and REST API, spanning 45+ pages (React, TypeScript, NestJS, Prisma, PostgreSQL).
- Integrated online payments through a third-party gateway with automated reconciliation, and built a configurable pricing engine for tax, fees, promotions, and delivery.
- Launched a B2B ordering channel with role-based access and separate retail and wholesale pricing, replacing manual ordering.
- Delivered real-time order tracking, live chat, back-office automation, and automatic receipt printing through Android and Windows print agents.
- Applied secure development practices (authentication and authorization, input protection, automated security scanning) and shipped CI/CD with Docker, GitHub Actions, and about 95 automated test files.

Portfolio Projects: Live demos built with Next.js, React, Angular, and Vue (storefront, admin dashboard, and invoice tool) on the portfolio website.

Education

Bachelor of Economics (S.E.), Management – Financial Management Sep 2015 – Apr 2021
Universitas Kristen Satya Wacana, Faculty of Economics and Business *Salatiga, Indonesia*

Coursework: Financial Management, Banking & Financial Institutions, Managerial Accounting, Risk Management, Business Statistics, E-Business.
